

## METHOD AND APPARATUS FOR PROVIDING CUSTOMIZED SOUVENIR IMAGES

### Abstract

A method and system that captures and delivers customized souvenir images to a plurality of  
5 attendees at a sporting event, music concert, and the like. Individuals wanting to receive a copy of  
these images provide location information, such as their assigned seat number. The present  
invention uses this information to identify the proper image and deliver it to the customer.  
Embodiments of the present invention may be adapted for use in a kiosk and to deliver the picture  
over a computer network, such as the Internet.
